# JUNIOR LYCEUM and SECONDARY SCHOOL <br> ANNUAL EXAMINATIONS 2009 

Directorate for Quality and Standards in Education
Educational Assessment Unit

## FORM 4 (2 ${ }^{\text {nd }}$ year) GRAPHICAL COMMUNICATION TIME: 2 hours

## NAME

$\qquad$ CLASS $\qquad$

## Instructions

- Write your name and class on all sheets.
- Attempt ALL questions.
- All answers are to be drawn accurately, with instruments, unless otherwise stated.
- All construction lines MUST be left on each solution to show the method employed.
- Drawing aids may be used.

## Information

- All dimensions are in millimetres.
- Estimate any missing dimensions not given.
- Marks will be awarded for accuracy, clarity and appropriateness of construction.

| Question | $\mathbf{1}$ | 2 | 3 | 4 | 5 |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Max. mark | 36 | 14 | 14 | 18 | 18 |
| Mark |  |  |  |  |  |

1. The figure below shows an isometric view of a SUPPORT BRACKET.
(a) Draw, full size, using third angle projection, the following views:
(i) a complete front elevation looking in the direction of arrow ' $\mathbf{A}$ ' including all hidden details in this view only.
(ii) a sectional side / end elevation, the section being on $\mathbf{X}-\mathbf{X}$.

20 marks
(b) Add the following to your drawing:
(i) the appropriate symbol to indicate the projection angle.
(ii) the scale.

4 marks

All Fillet Radii 5 mm

PLAN
2. A dimentioned profile and an incomplete version of a sea horse are given. Using the given centres on the starter sheet for the R12 circles and the common tangential point $\mathbf{P}$, construct geometrically the remaining part of the sea horse. All construction used to find the centres of all arcs is to be clearly shown.
Note: the drawing given is not drawn to scale.
14 marks

3. The figures below show a line diagram and a pictorial view of a simple mechanism. The disc rotates clockwise about centre C. Link PS is pin jointed to the disc at D , while end S is free to slide along the vertical centre line.
Using the line diagram given on the starter sheet, plot the locus of point $\mathbf{P}$ of link PS for one complete revolution of the disc (crank DC).

14 marks

4. Three orthographic views and an isometric drawing of a Barbeque Area are shown below. Using the given start lines, draw a $\mathbf{6 0}{ }^{\circ} / \mathbf{3 0}$ planometric view, positioning corner ' $\mathbf{A}$ ' to appear in the foreground.
Note that the tiles measure $10 \mathrm{~mm} \times 10 \mathrm{~mm}$

5. The figure shows an assembly of a key chain which consists mainly of an elliptical holder attached to a circular key ring.
(a) To a scale of $2: \mathbf{1}$, construct the right hand half of the ellipse, using any recognized method other than a trammel, on the given start lines.
(b) Draw the blending (touching) arc which is tangential to both the ellipse at point ' $\mathbf{A}$ ' and the straight part of the key chain marked as 'B'.
The centre of the radius, which is to be constructed geometrically, lies at the intersection of normals from $\mathbf{A}$ and $\mathbf{B}$.
Note: No marks will be given if construction lines are not shown.

18 marks

## QUESTION No. 4
